Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-20, drawn to a system for ablating tissue, classified in Class 600, subclass 104.
- II. Claims 21-27, drawn to a method for ablating tissue, classified in Class 606, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the apparatus could be used in an endoscopic method.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. Serial No. 08/529,354 Art Unit 3311
